8 PC.	1/2" OD	.200 TALL	

****NEW** TITANIUM (9/16" Hex Car Saver Flange Nut)**

If one of your heim inserts blows apart, this 1/2"-20 flange nut will not allow the heim to break loose from the bolt. Made out of Titanium 6AL-4V material, this durable, one-piece nut has an OD of 1.125" and a 9/16" hex head. We've also added holes in the flange for safety wire, making sure this nut stays put, even in the roughest conditions.

It is a must have piece and a definite car saver!
